

Equinix

Equinix Project – Redwood City, CA

The Equinix Project stands as a testament to innovation and adaptability. Located in bustling Redwood City, California, this project was nothing short of dynamic—a fast-paced 4-story Tenant Improvement (TI) with a Roof Penthouse HVAC System Full Replacement. ATS embarked on this journey with unwavering determination, collaborating closely with the Engineer of Record to introduce ingenious Value Engineering concepts, ultimately resulting in cost reductions and shortened project timelines.

At the heart of this achievement were ATS's comprehensive services, including the application of cutting-edge BIM (Building Information Modeling), expert Project Management, and the seamless execution of In-House Construction. Notably, what sets this project apart is the unique challenge it posed—it was bid during Shelter In Place, underscoring ATS's commitment to securing work even in the face of uncertainty.

With a Contract Amount of \$5.8 Million and a total area of 107,000 sq. ft., the Equinix Project embodies ATS's spirit of innovation and resilience.

Contract Amount: \$5.8 Million
