

Gilead

Gilead Project – Foster City, CA

The Gilead Project was a significant feat, involving a critical HVAC Tenant Improvement (TI) within one of the buildings on Gilead's expansive campus in Foster City, California. ATS proudly provided top-notch BIM (Building Information Modeling) and Construction Services for this endeavor. The primary challenge in a Plans & Specs project of this nature was to meticulously dissect the Plans & Specs, ensuring the practicality of the HVAC system's construction.

ATS was diligently committed to maintaining the project's installation schedule while leaving no stone unturned. We issued RFI's (Request for Information) as necessary to seek clarifications and ensure that the project proceeded smoothly. Our precision and expertise played a pivotal role in successfully navigating the intricacies of this project.

With a contract amount of \$5.3 million and a total area of 132,000 sq. ft., the Gilead Project stands as a testament to ATS's dedication to delivering excellence in HVAC services.
