

# Valent Labs

## Valent Labs – San Ramon, CA

In the heart of San Ramon, ATS embarked on a groundbreaking project at Valent Labs, demonstrating exceptional expertise in HVAC and mechanical systems. This endeavor demanded meticulous execution across a spectrum of specialized tasks, ranging from integrating outdoor-rated VFD enclosures for lab exhaust fans to the installation of HEPA filter banks and cutting-edge Phoenix pressure controls.

Our team exhibited unparalleled precision in every aspect, ensuring the expert installation of exhaust duct connections, precise structural calculations, and the design and implementation of HHW piping loops. Throughout this complex undertaking, we maintained a keen focus on air and water balance, showcasing our commitment to unwavering quality.

Temperature control integration and design coordination meetings further underscored ATS's dedication to delivering unmatched HVAC solutions. Valent Labs stands as a testament to our ability to transform ambitious plans into reality, solidifying our reputation as leaders in HVAC innovation.

At ATS, we take pride in our contributions to the ever-evolving landscape of technology and innovation.
